

Good Clinical Practice

10 August 2024

Why GCP?

GCP stands for Good Clinical Practice, which is a set of ethical and scientific quality standards for conducting, recording, and reporting clinical research that involves human subjects. By following GCP, researchers can ensure that the research subjects' rights, safety, and well-being are safeguarded and respected, in accordance with the Declaration of Helsinki and other widely accepted ethical guidelines. GCP also helps to maintain the quality and reliability of clinical research data.

About GCP

This program is a comprehensive and practical introduction to Good Clinical Practice (GCP), the ethical and regulatory standards for conducting clinical trials. It is based on the international E6-ICH and CDSCO GCP guidelines which are widely accepted by regulatory authorities around the world. This program is suitable for both beginners and experienced clinical research professionals who want to refresh their GCP knowledge. It covers all the domains, levels and roles involved in clinical research and clinical trials. The program is delivered online through a virtual platform, where you will learn from domain experts and trainers from industry and academia.

★ Program Highlights

- Academia & Industry Faculty
- Interactive sessions
- Knowledge Sharing by KOLs and
- Post-Training Assessment
- Reference Material
- Training Certification

★ REGISTRATION

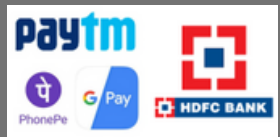

FEE- INR 2000/-
