Program Highlights

- Academia & Industry Faculty
- Interactive sessions
- Knowledge Sharing by KOLs and Experts
- Post-Training Assessment
- Reference Material
- Training Certification

Learning is the only treasure that will follow its owner everywhere.

Why GCP

Good Clinical Practice (GCP) is an internationally recognized set of ethical and scientific quality standards for the design, conduct, performance, monitoring, auditing, recording, analysis, and reporting of clinical research involving human subjects. It ensures the rights, safety, and well-being of participants are protected, while maintaining the integrity and reliability of the data. Adherence to GCP is critical for compliance with global regulatory requirements and for fostering trust in clinical research. Join this program to gain comprehensive knowledge of GCP principles and advance your expertise in ethical and high-quality clinical research practices.

ICH E6(R3): Good Clinical Practice

The ICH E6(R3) guideline, adopted on January 6, 2025, modernizes Good Clinical Practice by emphasizing risk-based quality management and flexibility in trial design. It aligns with technological advancements and innovative methodologies, ensuring participant protection and data integrity in today's complex clinical research landscape.
